Cloud Security Analyst | IAM & SOC Operations

Cloud Identity • IAM Security • Threat Detection & Incident Response

Professional Summary

Cloud-focused security professional with hands-on experience in IAM security, cloud misconfiguration analysis, and identity-based attack paths, complemented by strong SOC and incident response foundations. Experience includes threat detection, vulnerability management, and cloud security labs using AWS, Kali Linux, and MITRE ATT&CK. Brings 15+ years of experience supporting regulated, high-availability healthcare environments, translating operational risk awareness into effective security monitoring and incident response within time-sensitive systems. Actively pursuing cloud-first security roles with continued growth in identity security, web/API testing, and AI red teaming.

Core Skills

Cloud & IAM Security: AWS IAM policy analysis, least privilege design, identity abuse detection, cloud misconfigurations

SOC & Blue Team: Threat detection, alert triage, incident response support, log analysis, MITRE ATT&CK mapping

Threat & Vulnerability: Vulnerability scanning, risk prioritization, remediation analysis

Offensive & Emerging (Supporting): Web/API security fundamentals, cloud pentesting concepts, AI threat modeling

Tools & Platforms: AWS, Kali Linux, Nmap, Burp Suite, Metasploit, Wireshark, Nessus, OWASP ZAP, HTB, THM, Cybr.com

Hands-On Projects & Labs

AWS Cloud & IAM Security Labs (HTB, THM, Cybr.com)

- Identified IAM misconfigurations and evaluated identity-based attack paths.
- Practiced cloud-focused threat detection, misconfiguration remediation, and access control hardening.

MITRE ATT&CK Blue Team Home Lab (Caldera)

- Simulated adversary techniques and mapped detection gaps to MITRE ATT&CK.
- Evaluated defensive visibility and response opportunities across attack stages.

Threat & Vulnerability Analysis Labs

- Performed vulnerability discovery, prioritization, and mitigation validation exercises.

AI Red Teaming & Threat Modeling (Exploratory)

- Studied AI attack surfaces and threat modeling scenarios to inform defensive posture.

Professional Experience

Healthcare IT & Clinical Systems Specialist

AdventHealth & Affiliates

15+ years

- Supported mission-critical systems in regulated, high-risk healthcare environments.
- Collaborated with cardiology departments across large teaching hospitals to support ICAEL accreditation initiatives by coordinating system validation, technical documentation, and compliance evidence.
- Applied risk awareness, audit readiness, and incident escalation judgment in time-sensitive operational settings.

Education & Certifications

- M.S. Cybersecurity Strategy — George Washington University
- INE Certified Cloud Associate (ICCA) — Completed
- ISC2 Certified in Cybersecurity (CC) — Completed
- CompTIA Security+ (SY0-701) — Scheduled (Dec 2025)
