

David Brooks Cox

Security Operations | Threat Detection & Incident Response | Cloud Security St. Petersburg, FL · [linkedin.com/in/davidbrookscox](#) · [github.com/siestakeydbc](#) · [cloudpuncher.dev](#)

Summary

Security operations professional with 10+ years in regulated enterprise environments and active hands-on SOC experience using production-grade tooling. Combines a rare foundation in healthcare compliance, access control, and incident response with current internship work in threat detection, vulnerability management, and cloud security. Targeting SOC Analyst roles with a long-term focus on cloud-native security operations, detection engineering, and AI-augmented threat analysis.

Core Competencies

Threat Detection & Response	Cloud & Identity Security	Tools & Platforms
SIEM Alert Triage & Tuning	AWS Security (GuardDuty, CloudTrail)	Splunk · Wazuh · Elastic/ELK
Incident Response & Playbook Development	IAM · Least Privilege · Access Reviews	Nessus · OpenVAS · BloodHound
Threat Hunting & Behavioral Analysis	Azure · Microsoft Sentinel	CrowdStrike · Microsoft Defender
Vulnerability Assessment & Prioritization	Cloud Misconfiguration Discovery	PowerShell · Python · Bash
MITRE ATT&CK Framework	HIPAA · NIST · HITRUST Compliance	JIRA · ServiceNow · Tenable
IOC Analysis & Malware Triage	Identity Attack Path Analysis	Wireshark · IDS/IPS · SharpHound

Experience

Security Analyst Intern — Threat Intelligence & Vulnerability Management

LOG(N) Pacific · Remote · Jul 2025 – Present

Enterprise SOC simulation platform providing hands-on experience with production-grade security tooling across cloud, identity, and threat detection disciplines.

- Conduct cloud-focused vulnerability assessments across 50+ systems per cycle, validating and prioritizing 15–20 findings using Tenable Nessus and OpenVAS
- Investigate and triage 25–40 SIEM alerts weekly in Splunk and Wazuh, contributing to measurable improvement in detection quality and reduced MTTR
- Build AWS detection labs using CloudTrail, GuardDuty, and Wazuh to simulate IAM

misconfigurations, excessive permissions, and privilege escalation scenarios

- Analyze identity-based attack paths using BloodHound and SharpHound to identify escalation risk and improve identity visibility across enterprise environments
- Automate vulnerability triage summaries using local LLM workflows (Ollama, GPT4All), reducing manual reporting effort by ~50% — one of few analysts integrating AI tooling into detection workflows
- Develop executive dashboards highlighting aging high-severity vulnerabilities to support remediation prioritization and leadership reporting

Tools: Splunk · Wazuh · AWS CloudTrail · GuardDuty · Nessus · OpenVAS · BloodHound · Ollama

Clinical Systems Information Specialist

AdventHealth West Florida · Sarasota, FL · Hybrid · Jul 2023 – Present

Security-adjacent role within a regulated healthcare enterprise, directly supporting HIPAA, NIST, and HITRUST compliance programs across teaching hospital systems.

- Maintain mission-critical clinical systems across teaching hospitals with 99.9% uptime in regulated healthcare environments, supporting availability requirements equivalent to SOC SLA standards
- Partner with cybersecurity, IT, and compliance teams to support HIPAA, NIST, and HITRUST readiness, contributing to 30+ audits with zero critical findings
- Lead access control reviews and configuration assessments reinforcing least-privilege principles across enterprise clinical platforms
- Respond to system incidents and downtime events, coordinating rapid escalation and recovery — directly applicable to SOC Tier 1/2 incident handling workflows
- Authored incident response and downtime playbooks later adopted as system-wide best practices, demonstrating ability to translate operational experience into structured documentation

Tools: Epic · Cerner · Active Directory · SCCM · PowerShell · ServiceNow · Splunk Focus: High-Availability Systems · IAM · Incident Response · Compliance

Cybersecurity Analyst Intern — Threat Detection & SIEM Operations

JPMorgan Chase & Co. · Remote · Jun 2023 – Sep 2023

- Analyzed 500+ security event datasets weekly to identify fraud and potential data exfiltration, reducing false positives by 18%
- Built and tuned SIEM correlation rules and dashboards in Splunk and ELK, improving triage efficiency by 25%
- Supported incident response simulations and phishing-resilience testing, improving MTTC by 30%
- Conducted threat modeling and vulnerability triage, delivering weekly executive summaries to senior stakeholders

Tools: Splunk · ELK · Python · PowerBI · JIRA · ServiceNow

Cyber Security Consultant Intern

PwC Switzerland · Remote · Mar 2023 – Jun 2023

- Conducted cloud security risk assessments for enterprise clients across AWS, Azure, and GCP, identifying misconfigurations and reducing overall cloud exposure by 20%+
- Supported IAM audits and access reviews, resolving excessive privilege issues across 200+ accounts and improving identity governance controls
- Led threat-modeling workshops mapping client environments to MITRE ATT&CK and CIS Controls, helping teams prioritize remediation with measurable KPIs
- Deployed and optimized automated vulnerability scanning pipelines, reducing manual validation time by 30%
- Authored executive-level risk summaries and technical reports aligned with NIST 800-53 and ISO 27001

Tools: AWS Security Hub · Azure Defender · GCP Security Command Center · Nessus · Burp Suite · OWASP ZAP

Cybersecurity Specialist Intern — Blue Team & Cloud Defense

ANZ Worldline Payment Solutions · Remote · Jan 2023 – Mar 2023

- Monitored and triaged enterprise SIEM alerts across financial systems, supporting 24/7 SOC operations and escalating high-confidence incidents for response
- Participated in incident response investigations, analyzing IOCs and supporting containment and recovery actions
- Conducted threat hunting using log analysis and behavioral indicators to identify suspicious activity beyond signature-based detection
- Updated and refined SOC runbooks and response playbooks, improving alert consistency and reducing analyst handling time

Tools: Splunk · SIEM Platforms · EDR Tools · JIRA

Cybersecurity Specialist Intern — SOC & Threat Operations

Telstra GmbH · Remote · Oct 2022 – Jan 2023

- Analyzed enterprise network traffic and security events to detect anomalous behavior and potential intrusion attempts across large-scale environments
- Supported IDS/IPS monitoring and alert analysis, assisting in identification and escalation of network-based threats
- Assisted in network security assessments, identifying misconfigurations and control gaps that increased exposure to lateral movement and data exfiltration

Tools: SIEM Platforms · IDS/IPS · Network Monitoring · Wireshark

Healthcare IT & Quality Systems Consultant

AMN Healthcare Leadership Solutions · United States · Jul 2015 – Jan 2023 (7 yrs 7 mos)

- Supported enterprise clinical and operational systems in regulated environments, ensuring availability, integrity, and secure access to mission-critical platforms
- Assisted with user access provisioning, validation, and troubleshooting, reinforcing least-privilege principles and access control consistency
- Responded to system incidents and outages, coordinating with engineering and support teams to restore services in time-sensitive scenarios
- Contributed to audit readiness and compliance efforts, maintaining accurate system documentation and supporting validation activities

Focus: Systems Reliability · Access Control · Incident Response · Compliance Support

Healthcare Technology Representative

Surgical Services Ltd. · Miami-Fort Lauderdale · Feb 2013 – Jan 2015

- Worked with healthcare executives and IT teams to deploy and integrate clinical technology systems in regulated hospital environments
 - Supported HIPAA and HITECH compliance requirements, aligning technology implementations with security and audit standards
 - Developed early experience in risk mitigation, regulatory compliance, and system implementation — forming the foundation for transition into cybersecurity and IT security operations
-

Education

Master of Professional Studies — Cybersecurity The George Washington University · GPA: 3.9 · Graduated January 2019

Bachelor of Science — [Add Field] [University Name] · [Graduation Year]

Certifications

Certification	Issuer	Year
ISC2 Certified in Cybersecurity (CC)	ISC2	2025
INE Certified Cloud Associate (ICCA)	INE	2025
CompTIA Security+ (In Progress)	CompTIA	Expected July 2026

Projects & Portfolio

Project	Description	Link
---------	-------------	------

Project	Description	Link
Phishing IR Playbook	Full incident response playbook with CLI examples, MITRE mapping, and 5-phase documentation	View
SOC Analyst Portfolio	IR playbooks, detection rules, threat hunt write-ups, and log analysis	View
cloudpuncher.dev	Personal security portfolio and project documentation site	View

Training & Development

- Josh Madakor SOC Internship — LOG(N) Pacific (2025–Present)
 - TCM Security Academy (2024–Present)
 - Threat intelligence, cloud security, penetration testing, and detection engineering coursework
